WHEN YOU USE OUR AMAZING  
**NON-SALT DE-ICER**

### ICEMELT SUPER THERM ICE AND SNOW MELTING COMPOUND

Icemelt is an exothermic or heat generating compound that melts ice, snow & sleet up to eight times faster than rock salt. Keeps melted ice and snow from refreezing. Icemelt actually generates heat to quickly clear paths, drives, loading bays & parking bays etc.

 **PREVENTS RE-FREEZING!**

 **PENETRATES THICK ICE**

 **8 X FASTER THAN  
ROCK SALT!**

**22.5 KG FOR ONLY  
£49.95 + VAT**

## BENEFITS & FEATURES

-  **Exothermic Reaction** - Heat is generated to penetrate the ice and break it up from underneath.
-  **Instantaneous Action** - Works at least 8 times faster than rock salt.
-  **Effective to -59 c** - Penetrates and breaks ice bond to ground. Keeps working long after other methods have stopped.
-  **Residual** - Resultant mix of Icemelt Super Therm and water is an anti-freeze solution which will not re-freeze.
-  **Safe & Clean** - Dissolves completely to a colourless liquid, will not leave dirty deposits. Will not damage paths, road surfaces or vehicles, or floor surfaces if trodden indoors.
-  **Economical** - Spread sparingly and residual action means it will last longer than rock salt.
-  **Preventative** - Can be used before ice and snow are imminent.
-  **100% Soluble** - Dissolves completely, safer for the environment.
-  **Icemelt Super Therm** - Should be used to melt ice, snow and sleet from paths, drives, loading bays, parking bays, steps, lobbies and reception areas etc.

**GENERATES  
HEAT!**
